Our Gas Free-Standing Convection Range offers the combination of a high performance convection gas oven with the functionality of a professional style cooktop.

Key Benefits

- Superior Cooking Versatility with a low-profile cooktop that boasts the largest Professional Style Continuous Grates, Extra Wide 25" Oven and Extra Wide (The surface is composed of two grates (right and left), which span the front and rear burners. This continuous surface is the largest in its class, making it easier for you to move and manage numerous and oversized pieces of cookware. Plus the grates have a special porcelain enamel coating that resists staining and chipping) and (Bosch makes space useable by including a 1.3 cu. ft. storage drawer under the oven. The full-extension ball bearing glides allow you to easily open and close

the drawer to access and store your stored baking sheets and cookware.)

- Optimal Cooking Results with Optimized Burner Spacing and Bosch Engineering Excellence (This Bosch exclusive features a right rear burner that is offset to the right side, allowing easy access to the oven controls while still accommodating a large piece of cookware. The burner with the largest heat output (15,000 BTU) is conveniently located on the right front to facilitate lifting and placing of heavier items and maximize the space. The left burners are aligned at their center, with each one being a different size to provide cooking flexibility.)

Operation is a simple and intuitive touch and turn combination at your fingertips. Easily access cooking modes with fewer steps:

- + Bake and Broil
- + Timed Bake
- + Convection Bake and Broil and Roast
- + Keep Warm
- + Dehydrate
- + Proof
- + Self-Clean

The touch through glass panel indicates cooking mode, temperature, lights, start, cancel or multiple oven control. No more guesswork. No more buttons. Just outstanding results every time.

- Advanced European Design brings style to your kitchen

reflector shield to provide wide coverage across the top of the oven, ensuring even browning and consistent cooking results. The silicon carbide glow bar igniter eliminates hot spots usually caused by pilot lights.)

- Extra Wide Oven Cavity: 4.6 cu. ft. (The sizeable interior has 6 rack positions, which makes cooking multiple dishes on multiple racks a snap. With a full 4.6 cubic feet of total volume, the oven can handle the largest holiday meal.)
- Easy Clean Smooth Oven Bottom
- Concealed Bake Burner (The 17,000 BTU bake burner, a feature of Bosch's Gas Free-Standing Convection Range, is hidden underneath the floor of the oven to increase the cooking space and transfer the heat more efficiently. The burner disperses the flame in the center from front to back and uses a heat diffuser to increase the transfer of heat along the floor of the oven. It is ignited with a silicon carbide glow bar, which eliminates the hot spots caused by a pilot light.)
- Variable Self-Cleaning with Safety Door Lock (To simplify your life even more, our automatic, convection assisted, adjustable Self-Cleaning cycle does the oven cleaning for you. Once the cycle is set, an audible tone tells you to remove the racks. When the oven heats up, the door locks automatically. Better cleaning results just got easier.)
- Automatic Oven Light(s): 1 (Up to two 40-watt incandescent lights along the rear wall of the oven make every cooking level visible from the outside window, allowing you to easily check your food. The lights come on when the door is opened and can also be turned on from the control panel.)

Cook Top

- One-Piece Upswept Cook Top
- Low-Profile to Countertop
- Sealed Burners - Every burner is sealed to prevent spills from leaking into the range. And for added convenience, sealed burners are easier to clean than open burners.
- Optimized Burner Spacing (This Bosch exclusive features a right rear burner that is offset to the right side, allowing easy access to the oven controls while still accommodating a large piece of cookware. The burner with the largest heat output (15,000 BTU) is conveniently located on the right front to facilitate lifting and placing of heavier items and maximize the space. The left burners are aligned at their center, with each one being a different size to provide cooking flexibility.)
